- Tell them how the Atlantic Coast pipeline will harm our farms, forests, and streams, and ruin the rural heritage that make this region special.
- Tell them how the ACP has motivated us to resist, how we won't permit surveying or negotiate a ROW easement, how we will participate in the FERC process, how we will vote and spread the word about the damage the ACP will cause.
- Tell Dominion that the proposed route through Buckingham, Nelson, Augusta, Bath, Highland (VA) and Pocahontas (WV) counties is the most costly, the most problematic and most dangerous route they could have possibly chosen.
- Dominion's stated mission includes "strengthening communities" and "minimizing environmental impacts." Their values include "safety," "ethics," and "excellence." Tell them how the ACP conflicts with ALL these goals!
- Tell them "good neighbors" don't sue landowners, promote climate-changing energy policy for profit, or pollute rivers by dumping coal ash wastewater.
- Send a copy of your letter to a newspaper as a *Letter to the Editor* to spread the word to others (and get Dominion investors' attention!)
