Re: Information Request for the Atlantic Coast Pipeline and Supply Header Project

Dear Mr. Bley:

The staff of the Federal Energy Regulatory Commission (FERC) requests that you provide the information described within the enclosure in association with Atlantic Coast Pipeline, LLC's (Atlantic) and Dominion Energy Transmission, Inc.'s (DETI) Atlantic Coast Pipeline (ACP) and Supply Header Project (SHP), respectively. Please note that the information described in the enclosure is necessary to address comments from the Commonwealth of Virginia Department of Health.

You should file a complete response within 20 days of the date of this letter.

The response must be filed with the Secretary of the Commission at:

Kimberly D. Bose, Secretary
Federal Energy Regulatory Commission
888 First Street NE, Room 1A
Washington, DC 20426

If certain information cannot be provided within this time frame, please indicate which items will be delayed and provide a projected filing date.

File all responses under oath (18 CFR 385.2005) by an authorized Atlantic representative. For all materials submitted, provide one hard copy addressed to the FERC's deputy environmental project manager (Julia Yuan), and provide electronic copies directly to our third-party environmental contractor, Merjent, Inc.

~2~

If you have any questions, please contact me at 202-502-6173 or email to david.swearingen@ferc.gov. Thank you for your cooperation.

Sincerely,

Dave Swearingen
Chief, Gas Branch 4
Division of Gas – Environment and
Engineering

Docket Nos. CP15-554-000, CP15-554-001, and
CP15-555-000

Please provide toxicological environmental and health information for Fusion Bonded Epoxy (FBE) coatings (*3M™ Scotchkote™ Fusion Bonded Epoxy Coatings and 3M™ Scotchkote™ Liquid Epoxy Coatings, or their equivalents*) used for coating the project's pipeline and associated utilities. Evaluate and report on the toxicity of the FBE from all potential exposure pathways including from direct and indirect human contact, ingestion or inhalation; as well as environmental pathways (leachability and mobility) in air, soils, surface water, and groundwater. The evaluation should likewise include an analysis of human and environmental exposure from the degradation of FBE due to exposure to sunlight, and sloughing (chalking) of the material.
